Planned Maintenance Activity Tonight

Planned actions: Tonight, the CDR will be experiencing an off-cycle maintenance window to migrate all metadata in the environment from the existing Hive Metastore to a new Glue Metastore in our consolidated Lakehouse environment. This change should not impact the end user community as no data is being moved or changed - all tables and databases should be accessible as normal through SAS and Databricks following the maintenance event.

Impacted Community: CDR and access to any data using Databricks and SAS will be unavailable.

Planned Downtime: Friday, February 16th, at 8:00pm ET to Saturday, February 17th, at 1:00pm ET.

Have Questions? Reach out to the CCSQ D&A team by contacting us via the methods the footer below.
