Planned Activity

Planned Actions: On Tuesday, June 25, 2024, at 4 p.m. Eastern Time (ET), we will release updates and enhancements for the QualityNet Operations Dashboard (QNOD). The following updates and enhancements will be implemented:

- Updates for Version 2.22.0:
    - Address vulnerabilities identified by the Netsparker Scan for QNOD.
    - Add the logic for determining the evaluation code.
    - Integrate the Anomaly model output into the evaluation code.
    - Update the service configuration to align with the service status determination logic.
    - Remove outdated New Relic token references from the environment configuration files.
    - Remove tutorial video links from the QNOD homepage footer.
- Artificial Intelligence/Machine Learning (AI/ML) enhancements for Version 0.1.0.0:
    - Anomaly models will be integrated into the backend of the QNOD dashboard for selected services to improve service degradation accuracy.

- Deploy models for Barracuda and FAS to work with Service health calculations.
- Deploy models for Confluence, Jenkins, and Jira to monitor unusual metrics and service uptime.

Impacted Application Development Organizations (ADOs): All QNOD users.

What To Expect: The QNOD Dashboard (**https://qnod.cms.gov/**) deployment will be from 4:00 p.m. until 6:00 p.m. ET.

For any questions, please feel free to contact the QNOD team on the **#help-qnod** Slack channel.
