August 16, 2023

QualityNet Operations Dashboard (QNOD) v1.2.0

Affected customers: All QualityNet users

What is happening?

On Wednesday, August 16, 2023, at 8 p.m. ET, we will be releasing a new version of the QualityNet Operations Dashboard (QNOD). This release will cause QNOD to be unavailable until 10 p.m. ET.

Why is this release happening?

New versions of QNOD are released each sprint to ensure that QNOD users have continued access to the latest product features and enhancements as well as fixes to any issues that have been resolved.

What are some of the enhancements included in the upgrade?

Users can expect the following new functionality with this release as well as fixes and/or security patching.

Service Monitoring Changes:

- **F5**
  - Add devices that handle non-production traffic.
- **Next Gen Firewall**
  - Add devices that handle non-production traffic.
- **Routing**
  - Remove the decommissioned Routing service from QNOD.

Resolved Issues:

- **HIDS/HARP Automation –** Resolved insufficient data for Git(Hub) Status KPI.

Known Issues:

- **CCSQ QuickSight** – Occasional insufficient data false positives for User Experience KPIs.
- **QNOD** – The time picker for service drill-down dashboards has been temporarily disabled to address possible issues with system stability.

The release notes for all past releases can be found in Confluence. Once you are on the Confluence page, click on the **Release Notes** tab at the top of the page.
