

Alert October 31, 2023

Planned Activity

Planned Actions: On Tuesday, October 31, 2023, at 4 p.m. ET, we will be releasing a new version of the QualityNet Operations Dashboard (QNOD2, Version 2.6.0).

Impacted Application Development Organizations (ADOs): All QualityNet Operations Dashboard users.

Planned Downtime: October 31, 2023, between 4:00 p.m. ET and 5:00 p.m. ET.

What To Expect: A new version is being released that includes adding the following Services:

- Airflow
- FireEye vNX
- IQIES
- Mailman
- McAfee WG
- MedTrak
- Next Gen Firewall
- QTSO
- PRS
- QCOR
- QNP
- VPN ASA
- Zeppelin

Note: The above new services drill down page, will show complete Health Composite chart data after 24 hours.

What are some of the enhancements included in the upgrade?

- **ClamAV Service** – The following new KPIs are added:
 - ECS Service Running Task Count
 - ECS Service CPU Used Percent
 - ECS Service Memory Used Percent
- **Service Drill down Page** - Health Composite graph has been modified to include a border, background color, and left-hand side y-axis labels is made like right side labels indicating the numbers (0, 50, 100) for better readability.
- **QNOD Footer links section** – ‘Share Feedback’ older link was removed.

Known Issues: "Open Issues" tile on the service drilldown page links to an older Jira project.

The Release Notes for all past releases can be found on [Confluence](#). Once you are on the page, click on the [Release Notes 2.0 tab](#) at the top of the page.
