# PRS 2.0 Development and Design

## February 2024 Update

This message provides current and/or planned updates for the **PRS 2.0 system development**. It also contains the PRS 2.0 reference materials for User Role process, data source overview, and the release timeline.

---

### **Important News & Announcements**

**Physician Group Module:** We are finishing up testing for this module and are targeting to have it live in PRS 2.0 by early March. More details will be provided as we get closer to the release, including when the PRS 1.0 version of that module will be decommissioned to coincide with this release.

**HSP Module Enhancements:** We've enhanced the HSP Advanced search to include *MOA Status*, *MOA Date Sent*, and *MOA Date Signed* as searchable fields. We also added the *MOA Date Sent* field as a new column on the HSP search results page.

**IPF File Upload Process:** We are finishing up development of this feature and will provide more information as we get closer to completion. We are still targeting this to be released in 1st Quarter 2024.

### **PRS 2.0 Modules and Simplified Production Roadmap**

Dates for forthcoming work are tentative and may be subject to change.
