RPA Governance Policy

As the Center for Clinical Standards and Quality (CCSQ) Robotic Process Automation (RPA) developer community continues to grow, the RPA Center of Excellence (CoE) would like to remind users of the measures in place to help you build safe, reliable, and successful bots. This includes restricting package sources to the approved safe sources only, UiPath's official packages and Orchestrator feed packages

The RPA CoE also enables UiPath's Workflow Analyzer on all bot builds to help users ensure that new bot builds are created in alignment with our development best practices. Please visit our blog post to learn more about these settings and the RPA Governance Policy. As always, if you have questions or need anything, please contact the RPA CoE in the #help-rpa Slack channel. We are here to help!

If you need additional information, contact us:
