

Deployment Successful

CCSQ ServiceNow Version Upgrade to Utah

Affected Customers: CCSQ ServiceNow Customers

The CCSQ ServiceNow upgrade from the San Diego version to the Utah version was deployed successfully.

CCSQ ServiceNow is upgraded annually to ensure that CCSQ ServiceNow customers have continued access to support services and the latest ServiceNow features.

What are some of the enhancements included in the upgrade?

Customers can expect some new functionality with this upgrade, which introduces several new features in the ServiceNow Platform and the Service Portal as well as some enhancements to existing features.

Some of the new functionality includes:

- Artificial Intelligence(AI)/Machine Learning(ML)
 - Natural Language Understanding enables the system to learn and respond to human-expressed intent
 - Task Intelligence uses machine learning to train solutions with your data and achieve important outcomes.
- The Next Experience UI
 - Enhanced AI Search across the platform
 - Theme Builder allows for consistent portal configuration with Human Centered Design thinking
- Multi-language Support
 - Virtual Agent – Dynamic Language detection and machine translation in conversations
 - Service Portal – Ability to provide content in preferred languages using a locale selector
- Knowledge Management
 - Improvements in search engine rankings to provide faster page load times
 - User-friendly URL structure makes finding articles easy

Where can I view more details about this upgrade?

- The [Release Notes](#) for upgrading from San Diego to Utah can be found on the ServiceNow website as well as the [Utah Release Fact Sheet](#).
