

Alert February 6, 2024

Reported Issue Update

The following Zscaler issue has been reported and is currently being investigated:

Issue Reported: Several users reported an issue connecting to Zscaler Monday, February 5, 2024.

Time Reported: February 5, 2024. starting at 6:50 AM ET, users began reporting connection errors with Zscaler.

What to Expect: Zscaler users are receiving an error message stating, "Access Blocked." The Access Management team identified a policy on the local computer that needed to be updated for a subset of users after completing the Zscaler network infrastructure changes communicated on January 28, 2024. Updating the policy on the local computer for the subset of users is resolving the issue for most users.

The Access Management team continues to work with the users that are reporting Zscaler issues to the Service Center SOS team. Users experiencing this issue should contact the Service Center SOS team on Slack for [Support](#).

We apologize for the disruption of service and are working quickly to resolve the issue. We will send updates every two hours during normal business hours, or the next morning, until the issue is resolved.

If you need additional information, contact us:
