

## QualityNet Lucid Role Request Instructions

Due to the limited number of available licenses for the QualityNet Enterprise Lucid Suite, strict adherence to the below policies for approving Lucid role requests must be followed.

### 3 Types of Lucid Roles & Their Entitlements

#### 1. Licensed Role

**Approvals ONLY for:**

- Board Owners
- Scrum Masters
- Release Train Engineers (RTEs)
- Product Owners
- Team Managers

*All others should request the Limited Access role.*

Licensed Lucid users are able to create and manage Lucidspark boards and Lucidchart diagrams. Licensees login at: <http://qnetlucid.cms.gov/>.

#### 2. Limited Access Role

**Approvals for:**

- All others

*If determined in the future, a license is required, a new HARP request should be submitted.*

This is a *limited access* role that requires each user register with Lucid. Users **can view unlimited Lucidspark boards and Lucidchart diagrams shared with them only via a shareable link** with guest collaborator permissions from the host/owner. Only a **max of five (5) boards per year can be edited in Lucidspark** by Limited Access users.

#### 3. Anonymous Role

**No role approval required**

This option does NOT require a Lucid role or Lucid registration. Anonymous Guests can only gain access via a shareable link with guest collaborator permissions from the host/owner. Users can view unlimited Lucidspark boards shared with them. However, there is **no access at all to Lucidchart**.
