Organizing around value

VALUE STREAM MAPPING

LACE

CCSQ Lean Agile Center of Excellence

Course short description

Value Stream Mapping is a valuable tool for improving organizational processes. In this 2-hour training, the LACE will provide a comprehensive overview of the subject. You will start by understanding the concept of organizing around value and the different types of value streams. The training will then cover the steps for mapping value streams and techniques for optimizing the flow of value. Finally, the course will discuss how to manage, maintain, and improve a value stream over time.

- Understand the benefits of organizing around value

- Recognize the types of value streams

- Learn the steps to map a value stream

- Explore how to improve the flow of value

- Manage, maintain, and improve a value stream
