The Value Stream

A value stream is everything required to satisfy a customer request, from the time of the request to the fulfillment of the request.

It includes every:
- **Person**
- **Asset**
- **Resource**
- **Process**
- **And All Information**

Value Stream Maps

Value Stream Maps are a tool with roots in LEAN practices and methodologies.

The maps help organizations identify and visualize the flow of materials, information, and activities required to deliver value to customers.

	Information Flow		Material Flow		Lead Time		Process Time

Supplier — Production Control — Customer

Process 1 — Process 2 — Process 3

Lead Time: Order Received — 6 Days — 2 Hours — 15 Min — 40 Min — 1 Day — 30 Min — 2 Days — Order Delivered

Process Time: 3 Hours — 10 Min — 8 Min — 10 Min — 30 Min — 2 Hours
