Planned Downtime: 30 minutes (*no downtime to users*)

What To Expect:

SO

- Enhancements
 - Implements new error messages for generic APIs
 - Adds search capability to the HARP help page to support users to quickly locate relevant information
 - Removes table headers (Device Type, Contact, and Status) if no two-factor devices are added
 - Adds dynamic help text on the HARP login page so that it is specific to the application being used
 - Implements backend updates to the PIV Card authentication flow
- Bug Fixes
 - Routes users to the ADO login page when the HARP authentication page is refreshed
 - Modifies the title for the HARP login page to reflect HARP ADO details
 - Provisions API errors to return with a status of 200 to support ADOs that consume the service
