

**Alert December 15, 2022**

## Planned Activity

**Planned Actions:** HARP v18.7 Production Release, 12/15/2022 at 4:30 PM ET

**Impacted Application Development Organizations (ADOs):** All HARP Users

**Planned Downtime:** 30 minutes (no downtime to users)

### What To Expect:

#### Enhancements:

- Proxy:
  - Include display name when making API call to request-history and userPendingRequests.
  - getPendingApprovals filter out completed role requests.
  - Updated pending approval API to return roles and organization when pending approvals are retrieved.
  - Updated requestForattribute field to only return username, not using first name and lastname.
  - Improved API performance by separate pending request process from request history processing.

#### Bug Fixes:

- Login
  - Updated displayed error message to be aligned with confluence page.
- User Profile
  - User will be able to navigate to slack link when user clicks on slack link in profile landing page.
- User API
  - Updated API to return error code when token is invalid.
  - Error summary will appear with proper spacing and passing the intended values.
- Triage tools add user
  - Allow user to add new groups by clicking on add groups.
- Hermes:
  - User can elevate LOA1 user to LOA3 user.
