

*September 27, 2022*

## Planned Activity

**Planned Actions:** The HIDS Network team will use a planned maintenance window to migrate outbound traffic for most remaining Production VPCs to the new Outbound Gateway (OB GW) **on Sunday, October 2, 2022.**

**Impacted Application Development Organizations (ADOs):**

- The impacted teams include Application Development Organization (ADOs) and HIDS, with remaining Production VPCs for migration.
- The following ADO teams are included in the planned migration effort:
  - ADO-1 (EQRS Portal)
  - ADO-4 (iQIES)
  - ADO-5 (QDIVS FIVS)
  - ADO-10 (QDAS)
  - ADO-13 (Flexion IFSCS)
  - ADO-15 (CDAC)
  - ADO-22 (STAR)
  - ADO-26 (EQRS Scoring & Feedback)
  - DEL (MT)
  - QCOR (MT)
  - HIDS
- **Note:** ADOs that have confirmed their VPC migration for a future date are not impacted.

**Planned Downtime:** The maintenance window is Sunday, October 2, 2022, from **8:00 p.m. to October 9, 2:00 a.m. ET.**

**What To Expect:**

- The HIDS Network team will route all outbound gateway traffic for the migrating VPCs through the new PACE OB GW beginning Sunday, October 2, 2022.
- Although downtime is listed during the six-hour maintenance window, there will be only brief traffic disruptions or latency limited to a few seconds each time as the VPCs' outbound routing is changed and propagates through the infrastructure.
- Once the migration work ends, the HIDS Network team encourages ADOs to test and report any issues in the [#pace\\_gw\\_migrations](#) Slack channel.
- Please alert your Customer Success Manager (CSM) if you need to escalate any issues.
