Planned Activity

Planned Actions: Upgrade **NPHUB-NGFW** firewalls to remediate vulnerabilities due to Tenable Plug-in ID 155369, 154723, 154829, 154853, 155315, 155447 — CHG0053528

Impacted Application Development Organizations (ADOs): ADOs & Ventech (all F5-hosted URLs)

Planned Downtime: March 1, 2022, 11:30 p.m. to March 2, 2022, 1:30 a.m. ET

What To Expect: Although downtime is listed with a two-hour window, only a limited, brief impact is expected during that time to related F5-hosted inbound URL traffic flowing through the firewall being upgraded, as the traffic is failed over to the other availability zone. Any disruption would be limited to a few minutes at most and, as with previous upgrades, that failover has been transparent to the user community.
