QualityNet | Network

Update: Inbound and Outbound Internet Gateway for Non-Prod Environments

Non-Prod Migration Scheduling

The QualityNet Network Team is ready to start scheduling non-prod migration dates with the Application Development Organizations (ADOs).

- Between **1/31/22 – 2/18/22**, the QualityNet Network Team will focus on pilot ADO migrations.
- Multi-Tenant ADOs will be contacted by the QualityNet Network Team between **1/31/22 – 2/18/22,** prior to any migration work.
- Single-Tenant ADOs can select non-prod (lower environments) migration cutover dates and timeframes beginning **2/22/22**. Migration windows will be in time blocks to allow time for testing and triage activities, if needed.
- The Customer Success Managers (CSMs) will coordinate the scheduling effort using the Confluence tracking page under the **ADO Calendar** tab.

Migration Strategy

- The Inbound Gateway migrations will focus on lower environment URLs, and the Outbound Gateway will focus on the Virtual Private Cloud (VPC) level. The QualityNet Network Team has the inventory and will confirm with the ADO before migrations start.

Testing Expectations

Once the URLs and VPCs are migrated for **non-prod** environments and the Network Team completes their checks, the ADOs must validate the following:

- Confirm that any application(s) migrated is working as expected for both inbound and outbound traffic, as appropriate.

- Validate application functionality, confirm external resources or connections communicate as expected, and ensure that the traffic originating from internal resources reaches the intended destinations.
- Work with the Network Team to triage any issues and be prepared to roll back any changes, if needed.

Need More Details?

- Join the **HCQIS Chat** on **February 3, 2022**, from 1:00 – 2:30 p.m. ET, for a presentation.
- Please check Confluence for updates on this effort and contact your CSM if you have questions or want a discussion with the QualityNet Network Team.

We appreciate all your continued support of this initiative!
