HCQIS AMIs now support new "x86" Instance types

The following is a correction to yesterday's communication regarding the "Graviton2 Instance Types". The HCQIS GOLD AMIs do **NOT** currently support the Graviton2 instance types. The GOLD AMIs (listed below) have been updated to support the below new "x86" based instance classes:

- M6i Instance Class
- M5n Instance Class
- M5zn Instance Class
- C5n Instance Class
- R5n Instance Class

Compatible HCQIS GOLD AMIs:

- Windows 2016
- Amazon Linux 2
- RHEL 7
- RHEL 8

NOTE: The HCQIS Cloud Team is currently working on a new Amazon Linux2 GOLD AMI that supports the Graviton instance types as these are ARM based processors and require new AMIs.
