QualityNet | DevOps Tools

October 17, 2022

Planned Activity

Planned Actions: DevOps Tools Monthly Maintenance

Impacted Application Development Organizations (ADOs): All ADOs and Ventech

Planned Downtime: Saturday, October 22, 2022, 6:00 p.m. – 9:00 p.m. ET

What To Expect: CloudBees Jenkins, Nexus Repository Manager, and Ansible Tower will undergo maintenance including upgrades and OS patching starting at 6 p.m. ET Saturday, October 22. We expect maintenance will be complete by 9:00 p.m. ET. Users may experience degraded service during this window.

- CJE OS Patching and Upgrade to 2.361.2.1
- Nexus Repository Manager upgrade to 3.42.0 and OS Patching
- Ansible Tower OS patching

Important Reminder: As announced earlier in September, the CJE upgrade will require all agents to be upgraded to Java 11 (Refer to the CloudBees Jenkins Agent Java Version - September Announcement in Confluence.) All Jenkins agents must be upgraded to use Java 11 to ensure connectivity to CJE masters after the upgrade.
