August 3, 2022

Hosted GitHub Enterprise

The DevOps team has noticed an increased high memory usage on the Self Hosted GitHub. The issue was investigated and was determined that increasing the resources on the service as soon as possible would be the optimal solution to avoid any unforeseen downtime.

We would like to perform this maintenance starting at 6:00 p.m. ET on August 3, 2022. Downtime is not expected to exceed more than an hour with self-hosted GitHub back online by 7:00 p.m. ET.

For questions or concerns, please reach out to us in the Slack channel **#hids-clouddevops-support**.
