

Alert March 15, 2022

Planned Activity

Planned Actions: HARP v15.7 Production Release, 3/15/2022 at 4:00 PM ET

Impacted Application Development Organizations (ADOs): All HARP Users

Planned Downtime: 30 minutes (no downtime to users)

What To Expect:

Enhancements:

- HERMES
 - Added Manual Proofing functionality
- SO
 - Created a new service as a solution for approval/rejections that ADOs can access and changed the HARP approval flow

Defects:

- Login
 - Updated the Logout from the Help and Contact Help Desk pages so that the user is logged out and taken to the HARP log in.
 - Updated logic so that if Voice was last used as the MFA Device it is set as the default.
 - Enhanced the error message when the Okta Verify Push notification has expired.
 - Login – Updated the redirect for user to enter their username and password when the user selects "Add new device" and an Okta Verify Push notification was previously sent.
- HERMES
 - Updated the User Roles page so that the information is also sortable by Program and Organization columns.
