

Alert April 29, 2022

Planned Activity

Planned Actions: HARP v16.1 Production Release, 4/29/2022 at 4:00 PM ET

Impacted Application Development Organizations (ADOs): All HARP Users

Planned Downtime: 30 minutes (no downtime to users)

What To Expect:

Defects:

- Contact Help Desk:
 - Updated the Give Us Feedback link so that it navigates the user to the correct page.
- Login
 - Updated Login so user sees Challenge Question screen and not Two-Factor Authentication screen when user clicks on Add New Device link and Okta Verify Push Device is not configured.
 - Updated the Okta Verify Push dropdown so that after Okta Verify Push device is added, it is not shown as selected.
 - Fixed the Login screen and removed the duplicate Training Videos and Help links
 - Fixed the redirect link so that the user is navigated to the Login screen.
- HERA
 - Removed the QualityNet Github Enterprise cloud duplication in Test.
- HOMER
 - Removed the delay when user searches for newly created organization, that organization is now displayed.
 - Error message for invalid Contract ID is displayed when the user enters Contract ID with a space.
 - Added error message when user assigns SPOC when a user does not exist, or user exists only in Okta.
 - Removed error when user assigns 5 or more programs.
 - Removed error when a user updates a SO of an organization to a new SO.
 - Updated the formatting so that an organization with 40 or more characters remains in the Assign Program, Delete Program and Remove Program pop up window.
 - Updated the organization search to exclude those that are deactivated and alert a user when creating a new organization that the name is already in use by a deactivated organization.
- User Profile
 - Updated to allow a username with an apostrophe.
- User Search Tool
 - Created error message that notifies that the User Search is performed with last or first name but not both with spaces in between the names.
