

Alert May 25, 2022

Planned Activity

Planned Actions: HARP v16.4 Production Release, 5/25/2022 at 4:00 PM ET

Impacted Application Development Organizations (ADOs): All HARP Users

Planned Downtime: 30 minutes (no downtime to users)

What To Expect:

Enhancements:

- Proxy Enhancement
 - Added a user validation endpoint to the Query User Proxy to determine if a user is active in Saviynt.
 - Enhanced the functionality of user creation by integrating the Registration API to the Internal User Create proxy service.

Defects:

- Account Recovery
 - Fixed redirect so that user is taken to the Reset Challenge Question screen.
 - Updated to allow a Last Name with apostrophe.
- Contact Help Desk
 - Added footer to the Contact Help Desk screen.
 - Fixed the Visit Enterprise User Administration (EUA) to reset username and password link so that it redirects user to the correct page.
- Registration
 - Updated to allow an email address with apostrophe.
 - Fixed validations on the Account Information screen.
 - Fixed validations so that only mandatory fields will result in an error if not entered.
- User Profile
 - Fixed email validation and will alert user that email address is already in use.
