

Alert June 3, 2022

Planned Activity

Planned Actions: HARP v16.5 Production Release, 6/3/2022 at 4:00 PM ET

Impacted Application Development Organizations (ADOs): All HARP Users

Planned Downtime: 30 minutes (no downtime to users)

What To Expect:

Enhancements:

- Proxy Enhancement
 - Integrated the Provision API with User Create API
- Security Officer
 - Added alert so that they are aware of pending tasks that require their attention.

Defects:

- HERA
 - Updated the Select Roles page so that the user can switch between program, organization, and roles pages and previously selected options remain.
 - Updated the Submit button so that it is enabled when one of the roles is checked in the role request screen then the user clicks back to the Organization selection page and selects the same Organization again.
 - Updated so that user IDs that contain an apostrophe can request and view pending role requests.
- HOMER
 - Added a message that there is no data available for the submitted search criteria.
 - Updated the search for Manage Organizations to allow for leading/trailing spaces.
- SO
 - Updated the Organization results so they are sorted alphabetically on the User Lookup screen.
 - Updated message for a SO that attempts to approve or deny a request that is no longer pending, they will receive a message stating that the request is no longer pending.
 - Removed the No Roles Found message from displaying when there are approved roles.
 - Added a page load indicator to inform that user that displaying all the results is occurring.
 - Displays the correct values in User Profile when that date exists.
 - Bolded the Security Official link on the Lookup/Request History screen.
