

Alert July 14, 2022

Planned Activity

Planned Actions: HARP v17.0 Production Release, 7/14/2022 at 4:00 PM ET

Impacted Application Development Organizations (ADOs): All HARP Users

Planned Downtime: 30 minutes (no downtime to users)

What To Expect:

Defects:

- HOMER
 - Created an error message alerting the user that they have assigned the same program again to an organization
 - Updated so that the user receives a success message after program is assigned.
 - Updated to prevent duplicate programs from being onboarded to the same organization.
 - Made the Continue button unavailable to a user if they do not enter required Additional Parameter.
 - Updated so that first Security Official is assigned when the QualityNet Analytics program is assigned.
 - Updated the API so the Okta group will get removed after the Organization is deleted (for Ansible Tower).
- User Profile
 - Updated so that missing data within the user's profile does not prevent the page from loading properly.
