QualityNet Operations Dashboard (QNOD) v5.1

On Wednesday, July 13, 2022, we will be releasing a new version of our QNET Operations Dashboard (QNOD).

New Feature(s):

- Full Decomposition for the following service(s):
  - QIES
  - QTSO

- Machine Learning Enablement – 30 Minute Uptime Prediction Model for the following service(s):
  - Barracuda
  - Syslog

Issue(s) Resolved:

- The following issues with service drilldown dashboards are fixed:
  - AD – Process Count KPI panels updated to show process names along with host names.
  - Certificate Authority – Process Count KPI panels updated to show process names along with host names.
  - ClamAV – Process Count KPI panels updated to show process names along with host names.
  - PRS – Updated legend name for the KPI panels.
  - Hive – Average Healthy Host Count and Process Count KPI panels updated with correct legend names.

- Drilldown dashboards for Office365, DELWeb, and McAfee WG services fixed to show host names in KPI panel labels.

Known Issue(s):

- Time picker for service drilldown dashboards has been temporarily disabled to address possible issues with system stability.
