June 8, 2023

AWS Security Hub Update

The Center for Internet Security (CIS) AWS Foundations Benchmark v1.4.0 was enabled in April 2023. This new version of the Security Standard Benchmarks encompasses and expands upon controls from v1.2.0 in AWS Security Hub.

Now that v1.4.0 is enabled and reporting, v1.2.0 is no longer needed and will be **disabled on June 14, 2023.**

There will be no downtime, but once CIS AWS Foundations Benchmark v1.2.0 is disabled, ADOs can expect to see findings only related to enabled Standards (CIS AWS Foundations Benchmark v1.4.0 and AWS Foundational Security Best Practices v1.0.0) in AWS Security Hub.

If you have any questions, please contact your ISSO, or post a message to the #qnet-security-community channel via Slack.

If you need additional information, please work with your assigned CMS Information System Security Officer (ISSO): List here, the HIDS Security Analyst team, or reach out on QualityNet Slack #qnet-security-community
