CCSQ DATA & ANALYTICS

August 4, 2023

Planned Activity

Planned Actions: A scheduled SAS Viya, Zeppelin, Databricks and CDR maintenance event will begin tonight, August 4th, at 8:00 pm ET. Please note that this maintenance event will include the second phase of the Lustre Migration as well as the second phase of the Databricks CASLIB Connection Updates (see more details below).

Impacted Community: All SAS Viya, Zeppelin, Databricks, and CDR Users

Planned Downtime: The scheduled maintenance event will begin tonight at 8:00 pm ET and end around 5:00 pm ET on Saturday, August 5th. A communication will be sent out once maintenance is complete.

Planned Activities:
- Routine Patching
- Lustre Migration – Phase Two (to see which groups will be migrating in this phase, access the Confluence page here).
  - *Please note that FileCloud integrations will not be available until Tuesday, August 8th. A communication will be sent out once the integrations are available.*
- Databricks CASLIB Connection Update – Phase Two (to see the list of CASLIBs impacted, access the Confluence page here)

Call to Action:

- Please ensure to save your work (i.e. data, script, and tables) before the maintenance event. This is to ensure that your information will be saved throughout the maintenance process. Any long running jobs would also need to be restarted after the event.
- Save your data from SAS Content to your workbench by following these instructions here.
- Please also save any of your CASLIB datasets before maintenance by also following these instructions here. After the maintenance window, you will need to load your tables back into memory in order to continue working with them.
