CCSQ DATA & ANALYTICS

November 3, 2023

Planned Activity

Planned Actions: A scheduled SAS Viya, Zeppelin, Databricks and CDR maintenance event will begin tonight, December 1st, at 8:00pm ET.

Impacted Community: All SAS Viya, Zeppelin, Databricks, and CDR Users

Planned Downtime: This maintenance event will begin on Friday, December 1st at 8:00pm ET and end on Saturday, December 2nd at approximately 3:00pm ET.

Planned Activities:

- Routine OS and Security Patching on CDR, SAS, and Databricks
- Routine patching on CSAT EMR Cluster
- Routine patching of the CentOS Servers
- Address security vulnerabilities
- ADO10 Database Migration – Phase 2 (see more details below)

Call to Action:

- Please ensure to save your work (i.e. data, script, and tables) before the maintenance event. This is to ensure that your information will be saved throughout the maintenance process. Any long running jobs would also need to be restarted after the event.
- Save your data from SAS Content to your workbench by following these instructions here.
- Please also save any of your CASLIB datasets before maintenance by also following these instructions here. After the maintenance window, you will need to load your tables back into memory in order to continue working with them.

ADO Data Migration – Phase 2 Migrates Tonight:

- The CCSQ D&A team will be migrating databases and tables to the new consolidated environment over the next two quarters. These migrations will take place during the production maintenance windows on the first Friday of each month
- The second phase of the migration will occur during tonight's maintenance event beginning at 8:00pm ET. To see a list of the databases that will be migrated this Friday, check out this article on Confluence.
- If you have any concerns related to contractual deliverables during this period, please reach out to our team through the request form, indicating when you would prefer to have your database migrated and we will do our best to accommodate.
- We ask that all users clean up their Hive databases to remove any unneeded, outdated, or archived tables. This will reduce the amount of data that needs to be migrated as well as reduce overall storage costs.
- Have Questions? Reach out to the CCSQ D&A team by emailing servicecentersos@cms.hhs.gov.
