CCSQ DATA & ANALYTICS

July 7, 2023

Planned Activity

Planned Actions: A scheduled SAS Viya, Zeppelin, Databricks and CDR maintenance event will occur tonight, July 7th, at 8:00pm ET. *Please note that this maintenance event will include the first phase of the Lustre Migration as well as the first phase of the Databricks CASLIB Connection Updates (see more details below).*

Impacted Community: All SAS Viya, Zeppelin, Databricks, and CDR Users

Planned Downtime: The scheduled maintenance event will begin at 8:00pm ET on Friday, July 7th and end early Saturday morning on July 8th. A communication will be sent out once maintenance is complete.

Planned Activities:
- Routine OS and Security Patching on CCSQ D&A environment systems
- Routine patching on CSAT EMR Cluster
- Routine patching of the CentOS Servers
- **Lustre Migration – Phase 1** (to see which groups will be migrating in this phase, access the Confluence page here)
- **Databricks CASLIB Connection Update – Phase 1** (to see the list of CASLIBs impacted, access the Confluence page here)

Call to Action:

- Please ensure to save your work (i.e. data, script, and tables) before the maintenance event. This is to ensure that your information will be saved throughout the maintenance process. Any long running jobs would also need to be restarted after the event.
- Save your data from SAS Content to your workbench by following these instructions here.
- Please also save any of your CASLIB datasets before maintenance by also following these instructions here. After the maintenance window, you will need to load your tables back into memory in order to continue working with them.
