

QualityNet | Operations Dashboard

October 26, 2023

Planned Activity

Planned Actions:

On Thursday, October 26, 2023, at 8 p.m. ET, we will release a new version of the QualityNet Operations Dashboard (QNOD) v1.6.0. This release includes security patching and service monitoring adjustments.

Impacted Application Development Organizations (ADOs):

All QNOD users.

Planned Downtime:

This release will cause QNOD to be unavailable from 8 p.m. until 10 p.m. ET.

What To Expect:

Users can expect the following new functionality, service monitoring changes, and fixes in addition to routine security patches.

Service Monitoring Changes

- **Confluence** – Remove unused Network Request Count Key Performance Indicator (KPI).
- **FAS** – Rename FAS service to AIMM to reflect recent contract changes.

Known Issues

- **CCSQ QuickSight** – Occasional insufficient data false positives for User Experience KPIs.
- **QNOD** – The time picker for service drill-down dashboards has been disabled to ensure system stability.
- **QNOD** – Work continues to permanently address recent data ingestion instability. Slack alerts have been disabled in the interim.

These and past release notes can be found on the [QNOD Confluence page](#) by clicking the **Release Notes 1.0** tab.
