

QualityNet | Operations Dashboard

Alert November 14, 2023

Planned Activity

Planned Actions: On Tuesday, November 14, 2023, at 4 p.m. ET, we will be releasing a new version of the QualityNet Operations Dashboard (QNOD2, Version 2.7.0).

Impacted Application Development Organizations (ADOs): All QualityNet Operations Dashboard users.

Planned Downtime: November 14, 2023, between 4.00 PM ET and 5.00 PM ET.

What To Expect: A new version is being released that includes adding the following Services:

- File Cloud
- QSEP
- SAS Viya

Note: The above new services drill down page will show complete Health Composite chart data after 24 hours.

What are some of the enhancements included in the upgrade?

- Users logging in through Identity Management (IDM) will be redirected to the last QNOD page they were on prior to session expiration.
- Adjusted how total health is displayed on the Health Composite graph for services where max health does not add up to 100%.

- Fixed a spacing issue on the Health Composite graph.

Known Issues:

- "Open Issues" tile on the service drilldown page links to an older Jira project.

The Release Notes for all past releases can be found on [Confluence](#). Once you are on the page, click on the [Release Notes 2.0 tab](#) at the top of the page.

For any questions or concerns, please feel free to reach out to the QNOD team on [#help-qnod](#) Slack channel.
