January 11, 2023

PRS 2.0 Planned Activity Success

PRS 2.0 Release 6.27.0 has been successfully deployed to Production!

What To Expect:

- This is the formal, wider Production release for HSP Edits functionality as communicated in the PRS 2.0 Development and Design Update communications sent on 12/1, 12/12, 1/3/2023, and 1/9/2023. Please reference those communications relative to Key Reminders for this Production release.
- In addition to the formalized, wider Production release, additional UAT period findings have been addressed:
    1. BFCC enhancement: Add New Physician Acknowledgement Monitoring (PAM) period to facilitate annual review/audit of all the physicians that were granted admitting privileges at a Health Service Provider in the previous year.
    2. In preparation for expanding the Edit History data tracking, added columns to the audit table: Previous Data, Data Changed.
    3. Updated the PRS 2.0 banner to reflect the instructions for entry and usage based on the December and January communications that have been sent.
