July 7, 2023

Updated QualityNet (QNET) Compliance Remediation Guide

The QualityNet (QNET) Compliance Remediation Guide has been updated and added to the QualityNet Security Confluence space → System Vulnerability & Compliance Management Confluence page.

The purpose of this document is to provide guidance to ensure that QualityNet assets are compliant with the approved baselines. The guide has been updated to reflect guidance around Service Level Agreements (SLAs) for Compliance tools (Tenable and Security Hub) **effective July 7, 2023**.

If you need additional information, please work with your assigned CMS Information System Security Officer (ISSO): List here, or reach out to the CMS CCSQ ISSO Group via email and/or QualityNet Slack #qnet-security-community
