QualityNet | Zscaler

May 19, 2023

PACE Zscaler Post-Migration

Who is Affected:
All QualityNet Amazon Web Services (AWS) Multi-Tenant and Single-Tenant Application Development Organizations (ADOs).

What's Happening:
The Zscaler migration is complete. Zscaler has been moved from the AWS environment to the Post-ADC Cloud Enhancements (PACE) environment. QualityNet is now in the post-migration phase of the process.

As of Friday, May 19, 2023, the last components of the Legacy Zscaler deployment were removed from the environment.

*****ACTION REQUESTED*****
All ADOs using custom-defined Legacy Zscaler Security Groups should begin decommissioning those groups or associated rules as appropriate. Going forward, PACE Zscaler access should only be used on management (MGT) interfaces for limited scope and duration.

Questions?
If you have further questions about this migration and how it affects you, please contact your Cloud Account Engineer (CAE) or refer to the Zscaler Confluence space.
