

INSPECT & ADAPT EXPLAINED

1. Identify the value and purpose of the I&A Workshop.
2. Understand the core modules of the workshop.
3. Identify and refine systemic issues impeding ART performance.
4. Experience a problem-solving workshop.

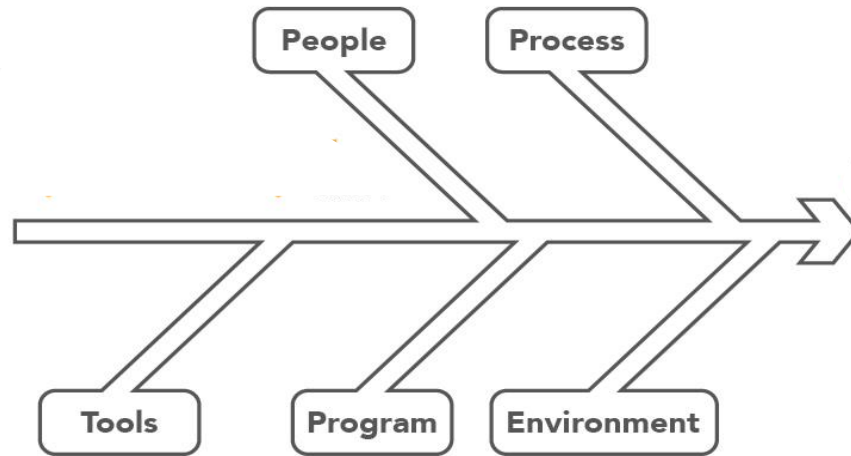

Quantitative and Qualitative Measurement

- **Who:** Facilitated by the RTE
- **Suggested Timebox:** 30 minutes
- Define metrics before the PI starts to review during this section of the I&A Workshop
 - Program predictability measure
 - Teams' planned capacity vs delivered velocity
 - Other delivery, performance and customer satisfaction metrics that are meaningful to the program
- Metrics should be prepared by the RTE before the workshop begins

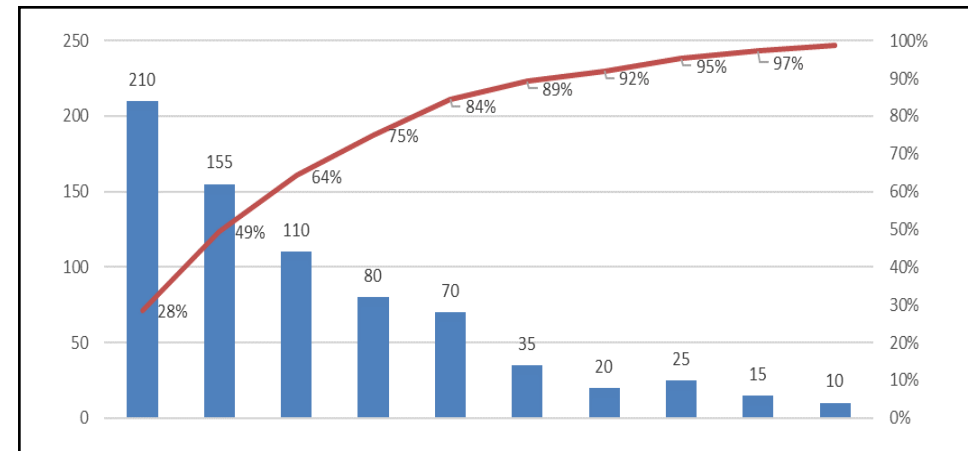

Pro Tip: Insights may evolve into discussion topics in the Problem-Solving workshop.

Example Issues:

- We had 5 escaped defects in the last prod release.
- Teams are spending too much time refining stories during PI Planning.
- Our bug per user story ratio is 14%.
