## Off-Cycle Maintenance: Planned Activity tonight

**Planned Actions:** A scheduled maintenance event will begin tonight, Friday, April 19th at 8:00pm ET.

**Impacted Community:** All Users.

**Planned Downtime:** Due to the volume of the data that needs to be migrated during this maintenance event, there will be an extended downtime window. The maintenance event will begin tonight, Friday, April 19th at 8:00pm ET and end on Sunday, April 21<sup>st</sup>, at approximately 11:59pm ET.

**Call to Action:**

- Any long-running jobs need to be restarted after the event.
- Be on the lookout for a communication with further instructions.

Please also save any of your CASLIB datasets before maintenance by also following [these instructions here](#). After the maintenance window, you will need to load your tables back into memory in order to continue working with them.

**Please note:**

- Users with GitHub repositories linked to SAS Viya must re-clone their repositories after the maintenance window.
- Additionally, those with previously scheduled jobs should reschedule them accordingly.
- For detailed instructions and further information about this maintenance event, please see our regularly updated [Known Issues and Improvements page](#).
- Instructions and a demonstration on how users can copy over the desired SAS Contents data to their workbenches can be found [here](#).

If you have any questions, please contact the CCSQ D&A Team via the methods in the footer below.
