February 2, 2024

Planned Activity

Planned Actions: A scheduled SAS Viya, Databricks, Portal and CDR maintenance event will begin tonight, February 2nd, at 8:00pm ET.

Impacted Community: All SAS Viya, Databricks, Portal, and CDR Users

Planned Downtime: This maintenance event will begin tonight, February 2nd at 8:00pm ET and end tonight, February 2nd at approximately 11:00pm ET.

Planned Activities:

- Routine OS and Security Patching on SAS, and Databricks
- Address Security Vulnerabilities
- Portal Cluster Upgrade

Call to Action:

- Please ensure to save your work (i.e. data, script, and tables) before the maintenance event. This is to ensure that your information will be saved throughout the maintenance process. Any long-running jobs would also need to be restarted after the event.
- Save your data from SAS Content to your workbench by following these instructions here.
- Please also save any of your CASLIB datasets before maintenance by also following these instructions here. After the maintenance window, you will need to load your tables back into memory in order to continue working with them.
