QualityNet | DevSecOps Tools

August 5, 2024

Planned Activity

Planned Actions: DevSecOps Tools Monthly Maintenance

Impacted Application Development Organizations (ADOs): All ADOs

Planned Downtime: Friday, August 9th, 6:00 p.m. – Saturday, August 10th, 6:00 p.m. ET.

What To Expect: Users may experience degraded service during this window.

The following DevSecOps tools will undergo Operation System (OS) patching and upgrade maintenance starting at 6 p.m. ET on Friday, August 9th:

- CloudBees Jenkins
- Nexus Repository Manager
- Ansible Automation Platform
- Hosted GitHub runner
- ClamAV
- Splunk
- RSyslog
- IBM Connect

This maintenance window will also include Service account password and credential updates for:

- STAR_DevOps Resource
- QMARS_DevOps Resource

We expect maintenance to be complete for most tools on this same day by 9:00 p.m. ET.

For any questions or concerns, please feel free to reach out to the DevSecOps team on Slack **#help-devsecops** channel.
