

## QualityNet | Operations Dashboard

*March 15, 2024*

### Planned Activity

**Planned Actions:** QNOD 2.0 updates to address Appliance Availability KPI issues, adjust FireEye vNX's window\_size parameter from 60 to 90 seconds in QNOD 2.0. This aligns the window\_size with New Relic's update frequency of every 60 seconds, avoiding conflicts with data being written to New Relic and resolving the problem.

**Impacted Application Development Organizations (ADOs):** All QNOD users.

**Planned Downtime:** Friday, March 15, 2024, between 4:00 PM and 6:00 PM ET.

**What To Expect:** The QNOD Dashboard (<https://qnetdashboard.cms.gov>) will be unavailable from 4:00 PM and 6:00 PM ET.

Please contact the QNOD team on the [#help-qnod](#) Slack channel for any questions or concerns.
