QualityNet | Operations Dashboard

Planned Activity

Planned Actions: On Tuesday, July 23, 2024, at 4 p.m. ET, we will release updates and enhancements for the QualityNet Operations Dashboard (QNOD). The following will be implemented:

- Updates for Version 2.24.0:
    - Implement User Interface (UI) changes for QNOD content pages for better readability and spacing.
    - Update Service status definitions for the dashboard.
    - Integration of QNOD JSON Web Token (JWT) with Amazon Web Service (AWS) Secrets Manager.
    - Update the Service configuration files to incorporate the New Relic and Splunk metric monitoring changes.
    - Update Service configuration files to accurately determine Service Uptime and Status.
- Artificial Intelligence/Machine Learning (AI/ML) enhancements for Version 0.4.0.0:
    - Anomaly model deployment for the services below will work with the Service health calculation and service uptime/status to improve service degradation accuracy.
        - Ansible, EQRS SF, F5, FireEye ETP, FireEye vNX, iQIES, McAfee WG, MedTrak, Next Gen Firewall, QCOR, and QSEP.

Impacted Application Development Organizations (ADOs): All QNOD users.

What To Expect: The QNOD Dashboard (**https://qnod.cms.gov/**) deployment will be from 4:00 p.m. until 6:00 p.m. ET.

For any questions, please contact the QNOD team on the **#help-qnod** Slack channel.
