QNOD   *February 20, 2024*

Planned Activity

As part of our ongoing efforts to enhance the efficiency and effectiveness of our operations, we will decommission the QualityNet Operations Dashboard (QNOD) QNOD1 since we have successfully migrated the 60 Center for Clinical Standards and Quality (CCSQ) health monitoring services from the QNOD1 to the **QNOD2** dashboard.

The QualityNet Operations Dashboard (QNOD) is a critical tool that offers a consolidated view of the health of the CCSQ ecosystem. QNOD integrates information and ingests KPI data from multiple monitoring sources (e.g., Amazon CloudWatch, HTTPS, New Relic, Splunk, TCP) and applications to understand how each service performs comprehensively.

Date: On **Tuesday, February 20, 2024**, QNOD1 will be decommissioned, discontinuing all services and health monitoring activities previously accessible on QNOD1.

Planned Downtime: The QNOD Dashboard will be unavailable on **February 20, 2024**, between 4:00 PM and 6:00 PM ET.

All service status information previously available on QNOD1 will be accessible exclusively through the **QNOD2** platform.

We appreciate your cooperation and understanding during this migration process. If you have any questions or concerns, please don't hesitate to contact the QNOD team on the **#help-qnod** Slack channel.
