February 20, 2024

Planned Activity

Planned Actions: Trend Micro Deep Security Manager (DSM) routine maintenance.

Impacted Application Development Organizations (ADOs): All ADOs

Planned Downtime: Wednesday, February 21, 2024, from 4:00 p.m. ET until 5:00 p.m. ET.

What To Expect:

- The ESS II Security team will be performing maintenance to update database tables for the RHEL-8 cutover.
- No action is needed by the ADOs.

For any questions or concerns, please feel free to reach out on the **#help-devsecops** Slack channel.

If you need additional information, please work with your assigned CMS Information System Security Officer (ISSO) (List here), the CCOM Security Analyst team, or reach out on QualityNet Slack: #qnet-security-community.
