## QualityNet | Analytics

Weekly Communication

December 21, 2020

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the SAS Viya application, the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- CCSQ Data & Analytics SAS Viya Learning Paths
- NCH Part A Data REV\_CNTR\_DT
- CSAT Part A and Part B 12 Month Historical Claims
- CSAT Part D Data Discrepancy Update
- Reference Codes Available in CDR
- CDR Weekly Refresh Update
- Knowledge Base Article of the Week
- Important Dates and Links

## **CCSQ Data & Analytics SAS Viya Learning Paths**

The Data & Analytics Modernization team is excited to announce a new addition to our training offerings, the CCSQ Data & Analytics SAS Viya Learning Paths. This resource on our Confluence page provides support and resources for beginner to advanced users as they work to improve their skills using the SAS Viya analytic tool, and utilize data in the Centralized Data Repository, or CDR. Our team has utilized Human-Centered Design practices to design each learning path with specific types of users in mind, thus each path will contain a unique

progression of courses, documentation, videos, and other materials to help users advance their skills.

Both the Data Analyst and Senior Data Analyst Learning Paths are now available. Please note that the content will continue to evolve as new information becomes available and best practices are established. If you have any questions, please contact us at HCQIS\_Data@hcqis.org. Click here to start your journey.

### NCH Part A Data – REV\_CNTR\_DT

It was recently reported that for some Part A claims beginning around 3/2020, the rev\_cntr\_dt displays '1970-01-01'. This is due to a change in the source data. It is expected for some data in this field to contain null or blank values. Any dates showing as '1970-01-01' in the rev\_cntr\_dt field should be treated as blank or null values. This same note applies to the ARVC CSAT files. A note has been added to the CDR Data Catalog for reference.

#### CSAT Part A and Part B - 12 Month Historical Claims

The CSAT Part A and CSAT Part B 12-month historical claims data for the time period July 2017 – April 2018 are now available. The Part D 12-month historical data is currently inprogress. If you have any questions, please contact us at HCQIS Data@hcqis.org.

## **CSAT Part D Data Discrepancy – Update**

The corrected CY2019 CSAT Part D files have been completed and are available as of 12/18/2020. The CY2018 CSAT Part D files are currently being re-run with a target availability date of 12/25/2020.

More information is posted to the DAMOD Known Issues Log. If you have any questions, please contact us at HCQIS\_Data@hcqis.org.

#### Reference Codes - Available in CDR

The Data and Analytics Modernization team has granted access to the 'resource\_ref\_codes' hive schema for CDR users. This schema provides a source for reference codes including HCPCS, condition codes, DRG codes, ICD diagnosis and procedure codes, and several others. More information including a full code list and the latest refresh dates are posted to the CDR Data Catalog.

## **CDR Weekly Refresh Update**

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 12/13/2020 - 12/19/2020. For specific refresh dates of each

source, please reference the CDR Data Catalog on Confluence. The following sources were refreshed:

#### CDR Hive Schema

beneficiary\_data
provider\_pmi\_data
nch\_part\_a
nch\_part\_b
public\_data (Zip Codes)
public data (FDA Drug Codes)

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please create a ServiceNow request for the "ADO-CDR-Support" and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. The "Most Recent Refresh" refers to the date the data was extracted from the legacy database or source system. This data is typically available 24-48 hours after extraction. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at HCQIS\_Data@hcqis.org.

# Knowledge Base Article of the Week: How to Terminate a SAS and Hive Job

This week's Knowledge Base article highlights "How to Terminate a SAS and Hive Job". This article will cover information on what to do when a job is taking longer than expected to process. Check out the article here on Confluence for detailed information.

## **Important Dates and Links**

Upcoming key dates:

- Communications Call January 21st at 1:00pm EST
- Communications Call February 4th at 1:00pm EST
- Communications Call February 18th at 1:00pm EST
- CCSQ Data & Analytics Data Camp Spring 2021

Please note these helpful quick links below, pointing you to some key spaces on our CCSQ Data & Analytics internet facing space on Confluence:

- CCSQ Data & Analytics Home Page
- Data Catalog
- Known Issues Log
- CCSQ Data & Analytics SAS Viya Learning Paths
- Communications Calls Archive
- Knowledge Base
