*Weekly Communication*

*January 11, 2021*

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the SAS Viya application, the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- CSAT Historical Data – Update
- CSAT Part D Data Issue
- NHQI Files Available
- CDR Weekly Refresh Update
- Knowledge Base Article Highlight
- Important Dates and Links

### **CSAT Historical Data – Update**

The historical CSAT Part A/B/D files (September 2016-June 2017) were made available on 1/8/2021. CSAT files for May 2014 - August 2016 are also planned to be made available in the future. A target date of availability will be shared for these historical files as soon as possible. If you have any questions, please contact us at [HCQIS\\_Data@hcqis.org](mailto:HCQIS_Data@hcqis.org).

### **CSAT Part D – Data Issue**

On 1/8/2021, a data discrepancy was identified in the CSAT Part D 'quantity\_dispensed' field. Some records were incorrectly showing 'quantity\_dispensed'=0 for the month of June 2020 in the CSAT\_5 file. This issue does not impact the DDPS Part D source data. The issue was resolved on 1/11/2021 and the corrected data is currently available. If you have any questions, please contact us at [HCQIS\\_Data@hcqis.org](mailto:HCQIS_Data@hcqis.org).

## NHQI Files Available

On 1/7/2021, the next quarterly delivery of NHQI files for NQIIC TO1 organizations was completed. These files are located in the SAS Viya workbench under the external data>nhqi folder. If you have any questions, please contact us at [HCQIS\\_Data@hcqis.org](mailto:HCQIS_Data@hcqis.org).

## CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 1/3/2021 – 1/9/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

CDR Hive Schema
beneficiary_data
provider_pmi_data
resource_hqr_prs
compare_nursing_home
nch_part_a
nch_part_b
ddps_part_d
health_plan
assessment_iqies
provider_iqies
csat – completed 12/31/20

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please create a ServiceNow request for the "ADO-CDR-Support" and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. The "Most Recent Refresh" refers to the date the data was extracted from the legacy database or source system. This data is typically available 24-48 hours after extraction. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at [HCQIS\\_Data@hcqis.org](mailto:HCQIS_Data@hcqis.org).

## Knowledge Base Article of the Week: How to Verify Access to Data in CCSQ Centralized Data Repository

This week's Knowledge Base article highlights "How to Verify Access to Data in CCSQ Centralized Data Repository". This article will cover information on how users can utilize code to see the full list of CDR schemas they currently have access to. Check out the article [here](#) on Confluence for detailed information.
