Weekly Communication

February 1, 2021

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the SAS Viya application, the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- CCSQ Data & Analytics Request Form – ***New!***
- New Help Desk Email – ***Important Announcement!***
- CSAT Update
- QMARS Data Issue – Update
- HQR Data Form Issue
- CDR Weekly Refresh Update
- Knowledge Base Article of the Week
- Important Dates and Links

New Help Desk Email – Important Announcement!

Effective immediately, the qnetsupport@hcqis.org email, used to open Help Desk tickets, has been replaced by the new HCQIS Services and Support email (ServiceCenterSOS@cms.hhs.gov). Moving forward, please email the HCQIS Services and Support email in order to open Help Desk tickets and report incidents. **Please do not direct your questions or issues to SAS Technical Services, as they will route you back toward the Data & Analytics Team.**

CSAT Update

On 1/27/2021, a discrepancy was reported in the CSAT Part D quantity_dispensed field. Some records are incorrectly showing quantity_dispensed=0 for September 2016 to June 2017. This issue does not impact the DDPS Part D source data. The issue is targeted to be resolved by 2/12/2021.

An additional issue has been reported impacting state code assignments for beneficiary state codes and provider state codes greater than '53'. This issue impacts Part A, Part B, and Part D files. Claims for the beneficiary and provider state numbers above '53' are not being assigned a state code to be included in CSAT. This issue is currently targeted to be resolved on 2/5/2021 for CSAT_2 and CSAT_5 files from 11/2018 to current. It is targeted to be resolved on 2/12/2021 for CSAT_2 and CSAT_5 files from 9/2016-10/2018.

QMARS Data Issue – Update

On 12/16/2020, an issue was reported with QMARS data where updates were no longer occurring in the source QMARS schema. Data updates stopped occurring for many tables between September to December 2020. The QMARS ADO has worked to resolve this issue and updated data has been made available in the CDR.

HQR Data Form Issue

On 1/27/2021, a data discrepancy was identified in the quality_measures_hqr_data_form.iqr table in the CDR. The "payment_year" column is incorrectly displaying calendar year. The column will be renamed to reflect "fiscal_year" and the data will be corrected. The HQR ADO is working to resolve the issue and it is targeted to be resolved by 2/2/2021.

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 1/24/2021 – 1/30/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on Confluence. The following sources were refreshed:

beneficiary_data
provider_pmi_data
resource_hqr_prs
resource_hqr_prs_supplemental
nch_part_a
nch_part_b
quality_measures_qpp_uds
csat_2
csat_5

requires data to be refreshed on a different timeline or cycle, please create a ServiceNow request for the "ADO-CDR-Support" and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. The "Most Recent Refresh" refers to the date the data was extracted from the legacy database or source system. This data is typically available 24-48 hours after extraction. The "Next Refresh" date marks the last possible day the data will be available in the CDR.

Knowledge Base Article of the Week: How to Verify Access to Data in CCSQ Centralized Data Repository

This week's Knowledge Base article highlights "How to Verify Access to Data in CCSQ Centralized Data Repository". This article will cover information on how users can utilize code to see the full list of CDR schemas they currently have access to. Check out the article here on Confluence for detailed information.

Important Dates and Links

Upcoming key dates:

- Communications Call   February 4th at 1:00pm EST

- Communications Call   February 18th at 1:00pm EST
- Scheduled CAP & CDR Maintenance Event   February 19th at 8:00pm EST
- CCSQ Data & Analytics Data Camp   Spring 2021

Please note these helpful quick links below, pointing you to some key spaces on our CCSQ Data & Analytics internet facing space on Confluence:

- CCSQ Data & Analytics Home Page
- Data Catalog
- Known Issues and Improvements
- CCSQ Data & Analytics SAS Viya Learning Paths
- Communications Calls Archive
- Knowledge Base
