Weekly Communication

May 24, 2021

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- Zeppelin Rollout Update – **Group 1 Onboarding Begins Tomorrow!**
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

Zeppelin Rollout Update – Group 1 Onboarding Begins Tomorrow!

The Data & Analytics Modernization Team will begin phased onboarding **tomorrow** for the new CCSQ Application Platform (CAP) tool, Zeppelin. Zeppelin will be offered alongside SAS Viya to organizations working with the Centralized Data Repository (CDR). *Please note that Zeppelin is not replacing SAS Viya, as Zeppelin will be an additional tool within the CCSQ Data & Analytics environment and part of the CCSQ vision to increase the number of collaboration tools for utilization.*

The first group of organizations will begin onboarding on Tuesday, May 25th. On Tuesday, June 1st, the second group of organizations will be notified to begin onboarding. The organizations within these groups submitted requests via the CCSQ Data & Analytics Request Form on Confluence and were selected based upon the priorities that the teams provided in their requests.

Please note that once all initial organizations are successfully onboarded and working in the Production environment, the DAMOD Team plans to provide all QualityNet Analytics organizations the ability to onboard into Zeppelin on June 8th. These other interested organizations would not need to fill out the request form on Confluence, as HARP roles will be available for them on that date to request. *If an organization is not interested in utilizing Zeppelin, no action is needed.*

Please see the Zeppelin Rollout Onboarding schedule below. If you have any questions about Zeppelin onboarding, please contact us at HCQIS_data@hccqis.org. If a team needs access to Zeppelin before June 8th and has not yet submitted a request, please submit a request via the [form on Confluence](#) and we will add your organization to Group Two for access on June 1st.

Zeppelin Rollout Onboarding Schedule:

1. Group 1 – Seven organizations begin onboarding **May 25th**
2. Group 2 – Additional seven organizations begin onboarding **June 1st**
3. Group 3 – All other interested organizations can start onboarding **June 8th**

For more information, please read through the following information on phased onboarding, support, and documentation on our Confluence site:

- [Zeppelin Interpreter Information](#)
- [Zeppelin FAQ](#)

CDR Data Issues Updates

The below list includes updates on current data issues within the Centralized Data Repository (CDR). Please monitor the [CDR Known Issues Log](#) for the latest statuses and targeted resolution dates.

Schema Name	Current Status
csat_2, csat_5 (Part B)	An issue in processing and guidance on Part B claims data [CARRIER only] recently occurred that impacted CSAT data. Based on the mainframe data, the data changed to 4 header/segments per claim consisting of up to 13 lines per header/segment [up to 50 lines total per claim] starting in August 2020. An evaluation was done to determine what

impact the segment issue would have on CSAT. The following are the total amount of claims impacted by month:

csat_2

Timeframe	Impacted Claims
August 2020	390 out of 63,644,576 claims
September 2020	614 out of 69,796,620 claims
October 2020	340 out of 72,182,567 claims
November 2020	490 out of 62,431,517 claims
December 2020	1,032 out of 64,940,282 claims

csat_5

Timeframe	Impacted Claims
August 2020	855 out of 67,352,752 claims
September 2020	1,004 out of 74,354,673 claims
October 2020	494 out of 76,598,570 claims
November 2020	1,502 out of 66,599,913 claims

When the update was identified, CSAT team began a monthly evaluation. Updates to the CSAT code are being made to account for the segment change. The updates will be incorporated into the May Refresh.

csat_2, csat_5 (Part B)	The Part B Final Action logic in the CSAT code is not processing in the correct order to meet the requirement for a static data set with 2-month and 5-month maturity. The issue was discovered when a rerun of the full CSAT was performed and the final action process identified adjustments and replaced the static final claims. Recent time periods are not impacted as much as the historical periods. The rerun for Part B in February 2021 introduced the issue more prominently when adjustments were included in the full CSAT.
csat_2, csat_5 (Part D)	The Part D Final Action logic in the CSAT code is not processing in the correct order to meet the requirement for a static data set with 2-month and 5-month maturity. The issue was discovered when a rerun of the full CSAT was performed and the final action process identified adjustments and replaced the static final claims. Recent time periods are not impacted as much as the historical periods. The rerun for Part D in December 2020 introduced the issue more prominently when adjustments were included in the full CSAT.
beneficiary_data	DAMOD is working with the data owner to confirm all inactive MBIs were restored. DAMOD will post an update once investigation is completed. We have also been made aware of other potential MBI issues and we have provided details to the BIC team so they can confirm the scope – once the scope is

	determined we will update the Known Issues Log with relevant details.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 5/16/2021 – 5/22/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

CDR Hive Schema
beneficiary_data
provider_pmi_data
nch_part_a
nch_part_b
provider iqies
assessment iqies
resource_hqr_prs
resource_hqr_prs_supplemental

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a [Request Form](#) and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at HCQIS_Data@hcqis.org.

Knowledge Base Article of the Week: How to Clean Up WORK Folder

This week's Knowledge Base article highlights the importance of cleaning up your SAS WORK location so that it allows the system to redistribute resources properly. Check out the article and best practice [here](#) on Confluence for detailed information and instructions.
