Weekly Communication

June 1, 2021

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- Zeppelin Rollout Update – *Group 2 Onboarding Begins Today!*
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

Zeppelin Rollout Update –
Group 2 Onboarding Begins Today!

The Data & Analytics Modernization Team will continue phased onboarding with Group Two today for the new CCSQ Application Platform (CAP) tool, Zeppelin. Zeppelin has been offered alongside SAS Viya to organizations working with the Centralized Data Repository (CDR). *Please note that Zeppelin is not replacing SAS Viya, as Zeppelin will be an additional tool within the CCSQ Data & Analytics environment and part of the CCSQ vision to increase the number of collaboration tools for utilization.*

The first group of organizations were provided onboarding instructions on Tuesday, May 25th. This morning, the second group of organizations were notified to begin onboarding and

requesting access to Zeppelin. The organizations within these groups submitted requests via the CCSQ Data & Analytics Request Form on Confluence and were selected based upon the priorities that the teams provided in their requests.

Please note that once all initial organizations are successfully onboarded and working in the Production environment, the DAMOD Team plans to provide all QualityNet Analytics organizations the ability to onboard into Zeppelin on June 8th. These other interested organizations would *not* need to fill out the request form on Confluence, as HARP roles will be available for them on that date to request. *If an organization is not interested in utilizing Zeppelin, no action is needed.*

Please see the Zeppelin Rollout Onboarding schedule below. If you have any questions about Zeppelin onboarding, please contact us at HCQIS_data@hcqis.org.

Zeppelin Rollout Onboarding Schedule:

1. Group 1 – Seven organizations began onboarding **May 25th**

2. Group 2 – Additional seven organizations begin onboarding **June 1st**

3. Group 3 – All other interested organizations can start onboarding **June 8th**

For more information, please read through the following information on phased onboarding, support, and documentation on our Confluence site:
- Zeppelin Phased Onboarding Information and Quick Start Guide
- Zeppelin Interpreter Information
- Zeppelin FAQ

CDR Data Issues Updates

The below list includes updates on current data issues within the Centralized Data Repository (CDR). Please monitor the CDR Known Issues Log for the latest statuses and targeted resolution dates.

Schema Name	Current Status
beneficiary_data	There is currently an open issue with Beneficiary Information on the Cloud (BIC) where MBIs overlap among multiple beneficiary keys for 63 cases. This affects the beneficiary_data schema in the CDR. BIC is currently working to correct this issue and will notify DAMOD when a target resolution date is available. Once the corrected data is available, the DAMOD team will refresh the data in the CDR.
csat_2, csat_5 (Part B)	An issue in processing and guidance on Part B claims data [CARRIER only] recently occurred that impacted CSAT data. Based on the mainframe data, the data changed to 4 header/segments per claim consisting

	of up to 13 lines per header/segment [up to 50 lines total per claim] starting in August 2020. Updates to the CSAT code are being made to account for the segment change. The updates are planned to be incorporated into the 6/2/2021 refresh. CMS has approved a re-run of the impacted CSAT Part B data to correct historically impacted files and a date for availability will be provided as soon as possible.
csat_2, csat_5 (Part B)	The Part B Final Action logic in the CSAT code is not processing in the correct order to meet the requirement for a static data set with 2-month and 5-month maturity. The issue was discovered when a rerun of the full CSAT was performed and the final action process identified adjustments and replaced the static final claims. CMS has approved a re-run of the impacted CSAT Part B data to correct historically impacted files and a date for availability will be provided as soon as possible.
csat_2, csat_5 (Part D)	The Part D Final Action logic in the CSAT code is not processing in the correct order to meet the requirement for a static data set with 2-month and 5-month maturity. The issue was discovered when a rerun of the full CSAT was performed and the final action process identified adjustments and replaced the static final claims. CMS has approved a re-run of the impacted CSAT Part D data to correct historically impacted files and a date for availability will be provided as soon as possible.
beneficiary_data	The data owner has confirmed that the missing MBI issue persists after their 4/26/2021 fix. They are working to evaluate the scope of the missing MBIs and determine a plan for correction. The examples provided by the DAMOD team are under review with their SMEs.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 5/23/2021 – 5/29/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on Confluence. The following sources were refreshed:

CDR Hive Schema
beneficiary_data
provider_pmi_data
nch_part_a
nch_part_b
quality_measures_darrt_qii
resource_hqr_prs
resource_hqr_prs_supplemental
quality_measures_hqr_char_abst
quality_measures_hqr_ecqm
quality_measures_hqr_data_form
quality_measures_hqr_val
provider_hqr_nop
resource_hqr_sec_admin
compare_nursing_home
public_data (Zip Codes)
public_data (FDA)

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a Request Form and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at HCQIS_Data@hcqis.org.

Knowledge Base Article of the Week: How to Reset User Preferences to Default in SAS Studio

This week's Knowledge Base article highlights the ability on how to reset user preferences in SAS Studio if you are experiencing an issue with the User Interface (UI). Check out the article and best practice here on Confluence for detailed information and step-by-step instructions.
