*Weekly Communication*

*July 12, 2021*

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- Livy2 Interpreter – Zeppelin Update
- NHQI Files Available
- Part A Claims – New Field Update
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

## **Livy2 Interpreter – Zeppelin Update**

The Data & Analytics Modernization Team continues to work with high priority to restore availability of the Livy2 Interpreter. Configurations for data access permissions within the environment are currently being tested. Once testing is complete, the teams will implement the changes in the Zeppelin environment and provide access to the user community.

Thank you for your patience as the team continues to investigate this issue. Further updates and a new availability date will be shared with the user community shortly.

## NHQI Files Available

On 7/6/2021, the next quarterly delivery of NHQI files for NQIIC TO1 organizations was completed. These files are located in the SAS Viya workbench under the external data>nhqi folder. If you have any questions, please contact us at [HCQIS\\_Data@hcqis.org](mailto:HCQIS_Data@hcqis.org).

## Part A Claims – New Field Update

As part of NCH CR #17, the *'Revenue Center Transitional Add-on Payment Adjustment for New and Innovative Equipment and Supplies (TPNIES) Amount'* field was added to Part A claims in April 2021. Until recently, all values in this new field *'REV\_CNTR\_TPNIES\_AMT'* have been '0'. Beginning in early July 2021, this new field will begin to be populated. Please be aware that you may begin to see this data within the next few weeks. If you have any questions on the field, please refer to the NCH data dictionaries posted to the CDR Data Catalog. Please note, this field is only planned to be populated for the Outpatient institutional claims.

## CDR Data Issues Updates

The below list includes updates on current data issues within the Centralized Data Repository (CDR). Please monitor the [CDR Known Issues Log](#) for the latest statuses and targeted resolution dates.

Schema Name	Current Status
qmars	There is an issue with QMARS data where the count of appeals in the CDR differs from the QMARS system. The QMARS ADO is working to investigate the issue and determine a resolution. Once the QMARS ADO corrects the data issue, the DAMOD team will pull the corrected data into the CDR.
beneficiary_data	There is currently an open issue with Beneficiary Information on the Cloud (BIC) where MBIs overlap among multiple beneficiary keys for 63 cases. BIC is planning to resolve this issue by the end of July 2021.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

## CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 7/4/2021 – 7/10/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

CDR Hive Schema
beneficiary_data
provider_pmi_data
nch_part_a
nch_part_b
ddps_part_d
quality_measures_darrrt_qii
resource_hqr_prs
resource_hqr_prs_supplemental
quality_measures_hqr_char_abst
quality_measures_hqr_ecqm
quality_measures_hqr_data_form
quality_measures_hqr_val
provider_hqr_nop
resource_hqr_sec_admin
qmars

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a [Request Form](#) and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at [HCQIS\\_Data@hcqis.org](mailto:HCQIS_Data@hcqis.org).

### Knowledge Base Article of the Week: How to Emulate PROC Format in Hive

This week's Knowledge Base article provides a step-by-step guide on how users can emulate PROC format in Hive, which is utilized for writing a dataset from SAS to HADOOP. Check out this article [here](#) on Confluence for detailed steps, sample code, and important notes.

## Important Dates and Links

Upcoming key dates:

- Communications Call – July 22nd at 1:00pm ET
- Scheduled Production Maintenance Event – July 23rd at 8:00pm ET
- Communications Call – August 5th at 1:00pm ET
- Communications Call – August 19th at 1:00pm ET
- Scheduled Production Maintenance Event – August 20th at 8:00pm ET

Please note these helpful quick links below, pointing you to some key spaces on our CCSQ Data & Analytics internet-facing space on Confluence:
