Weekly Communication

August 2, 2021

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- QMARS Next Generation (NG) – Update
- Communications Call Summer Hiatus – Reminder
- CDR Data Issues Updates
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

QMARS Next Generation (NG) – Update

The QMARS Next Generation (NG) schema is now targeted to be available in the CDR on 8/4/2021. The QMARS ADO is currently working on making the data available. Once the data is ready, access will be granted to users according to CMS DUA. The QMARS NG hive schema will be 'healthcare_service_qmars_ng'.

Communications Call Summer Hiatus – Reminder

Since many are on vacation during the month of August, we will be having a summer break from Communications Calls until we return mid-September. Thank you to those who attended the previous Communications Call and provided your feedback concerning future user events, as we will be using your feedback during the break to plan engaging content.

CDR Data Issues Updates

The below list includes updates on current data issues within the Centralized Data Repository (CDR). Please monitor the [CDR Known Issues Log](#) for the latest statuses and targeted resolution dates.

Schema Name	Current Status
csat_2, csat_5	There is a current data issue with the CSAT 'bene_death_dt' column where new dates of death are not being updated. The CSAT team is performing an investigation to determine the scope of the impact. This issue is related to the recently identified issue with the PRS beneficiary merge process.
resource_hqr_prs_supplemental	<p>The Beneficiary merge code for PRS was found to have an issue where it isn't updating existing records and new data isn't being loaded properly into PRS. This was identified with death data originally sourced from BIC.</p> <p>The following tables are impacted:</p> <ul style="list-style-type: none"> • resource_hqr_prs_supplemental.beneficiary • resource_hqr_prs_supplemental.bene_cross_reference • resource_hqr_prs_supplemental.entitlement_reason • resource_hqr_prs_supplemental.bene_migration • resource_hqr_prs_supplemental.bene_edb_mbi • resource_hqr_prs_supplemental.coverage <p>The HQR ADO is working on correcting this merge code and then pulling anything that was missed since Nov 2020. The issue is targeted to be resolved by 8/20/2021.</p>
qmars	There is an issue with QMARS data where the count of appeals in the CDR differs from the QMARS system. The QMARS ADO is working to investigate the issue and determine a resolution. Once the QMARS ADO corrects the data issue, the DAMOD team will pull the corrected data into the CDR.
beneficiary_data	There is currently an open issue with Beneficiary Information on the Cloud (BIC) where MBIs overlap among multiple beneficiary keys for 63 cases. BIC is planning to resolve this issue by the 8/9/2021.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32

characters long. No target date for resolution has been provided by the QMARS ADO.

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 7/25/2021 – 7/31/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on [Confluence](#). The following sources were refreshed:

CDR Hive Schema
beneficiary_data
provider_pmi_data
nch_part_a
nch_part_b
quality_measures_darrrt_qii
resource_hqr_prs
resource_hqr_prs_supplemental
quality_measures_hqr_char_abst
quality_measures_hqr_ecqm
quality_measures_hqr_data_form
quality_measures_hqr_val
provider_hqr_nop
resource_hqr_sec_admin
quality_measures_qpp_uds

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a [Request Form](#) and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at HCQIS_Data@hcqis.org.

Knowledge Base Article of the Week: Where to Store Data/Files in SAS Viya

This week's Knowledge Base article provides a guide on where to store data and files within the SAS Viya environment. Within this article, instructions are provided for SAS Code, data, and tables. Check out this article [here](#) on Confluence for best practices and instructions.

Important Dates and Links

Upcoming key dates:

- Scheduled Production Maintenance Event – August 20th at 8:00pm ET
