Weekly Communication

September 7, 2021

This email is part of a weekly communication series from the Data and Analytics Modernization team, designed to provide you the latest updates on the CCSQ Analytics Platform (CAP), the Centralized Data Repository (CDR), and user experience offerings.

This week's email contains information and updates on the following topics:

- CDR Data Issues Updates
- CDR CSAT Data
- CDR Weekly Refresh Update
- Weekly Knowledge Base Article
- Important Dates and Links

CDR Data Issues Updates

The below list includes updates on current data issues within the Centralized Data Repository (CDR). Please monitor the CDR Known Issues Log for the latest statuses and targeted resolution dates.

Schema Name	Current Status
resource_hqr_prs	The hlth_serv_provider table in this database currently has an issue with the rural/urban indicator. The Data Modernization team is working with the HQR team to

	determine an approach to provide accurate data in this column.
csat_2, csat_5	There is a current data issue with the CSAT 'bene_death_dt' column where new dates of death are not being updated. The CSAT team is performing an investigation to determine the scope of the impact. This issue is related to the recently identified issue with the PRS beneficiary merge process.
resource_hqr_prs_ supplemental	The Beneficiary merge code for PRS was found to have an issue where it isn't updating existing records and new data isn't being loaded properly into PRS. This was identified with death data originally sourced from BIC. The following tables are impacted: • resource_hqr_prs_supplemental.beneficiary • resource_hqr_prs_supplemental.bene_cross_reference • resource_hqr_prs_supplemental.entitlement_reason • resource_hqr_prs_supplemental.bene_migration • resource_hqr_prs_supplemental.bene_edb_mbi • resource_hqr_prs_supplemental.coverage The HQR ADO has worked to correct this merge code and pull anything that was missed since Nov 2020. The issue was targeted to be resolved by 9/1/2021. The Data Modernization team is reviewing the changes made by HQR to resolve the issue and will close it pending verification.
qmars	There is an issue with QMARS data where the count of appeals in the CDR differs from the QMARS system. The QMARS ADO is working to investigate the issue and determine a resolution. Once the QMARS ADO corrects the data issue, the DAMOD team will pull the corrected data into the CDR.
qmars	Longer text fields in the QMARS data are currently being truncated in the source schema. This issue is universal for columns with a string data type that are greater than 32 characters long. No target date for resolution has been provided by the QMARS ADO.

CDR CSAT Data

The CSAT team posted the August refresh for CSAT on Monday, August 30th. In this refresh, Part A and B changes were implemented to use the BIC data source for beneficiary information. Also, the missing NDC fields (ndc11 and product_srvc_id) were populated by the CSAT team.

The CSAT team also has updated the CSAT layouts and data dictionary, posting this information in the Data Catalog on Confluence. Please note that the Date of Death issue continues to be investigated and worked on by the team. The Known Issues Log will be updated will a resolution date once it is available.

CDR Weekly Refresh Update

Please note below the data refreshes that occurred within the Centralized Data Repository (CDR) during the week of 8/29/2021 – 9/4/2021. For specific refresh dates of each source, please reference the CDR Data Catalog on Confluence. The following sources were refreshed:

CDR Hive Schema
nch_part_a
nch_part_b
ddps_part_d
beneficiary_data
provider_pmi_data
assessment_iqies
provider_iqies
resource_hqr_prs
resource_hqr_prs_supplemental
qmars
health_plan
public_data (FIPS County Codes)
quality_measures_darrt_qii
quality_measures_hqr_char_abst
quality_measures_hqr_ecqm
quality_measures_hqr_data_form
quality_measures_hqr_val
quality_measures_hqr_pub_report
provider_hqr_nop
resource_hqr_sec_admin
healthcare_service_qmars_ng

The data refresh dates are published for awareness of data timeliness. If your organization requires data to be refreshed on a different timeline or cycle, please submit a Request Form and include details of your request including business justification, data source, requested refresh frequency, and requested refresh dates. Additional refresh details are included on the

data catalog within the source description. The "Next Refresh" date marks the last possible day the data will be available in the CDR. If you have any questions, please contact us at HCQIS_Data@hcqis.org.

Knowledge Base Article of the Week: How to Add Additional Team Members to FileCloud

This week's Knowledge Base article provides users steps on how to add additional team members to an organization with an existing FileCloud Network Share with access to SAS Viya workbench. Check out this article here on Confluence for detailed step by step instructions.

Important Dates and Links

Upcoming key dates:

- Communications Call – September 16th at 1:00pm ET

- Scheduled Production Maintenance Event – September 24th at 8:00pm ET
- Communications Call – September 30th at 1:00pm ET

Please note these helpful quick links below, pointing you to some key spaces on our CCSQ Data & Analytics internet-facing space on Confluence:

- CCSQ Data & Analytics Home Page
- Zeppelin Onboarding
- Data Catalog
- Known Issues and Improvements
- CCSQ Data & Analytics SAS Viya Learning Paths
- Communications Calls Archive
- Knowledge Base
